## Tool boxes for sale on amazon

#38 DEWALT Tool Box & Mobile Work Center (DWST20800) © 1996-2014, Amazon.com, Inc. or its subsidiaries © 1996-2014, Amazon.com, Inc. or its subsidiaries Our publishers independently research, test, and recommend the best products; you can learn more about our review process here. We may receive commissions on purchases made from our chosen links. Even if you are not considered manageable, you are still likely to have a hammer, screwdriver and tape measure at home to deal with these simple tasks such as hanging pictures and tightening loose knobs. And if you like to take on more complex DIY projects, you probably have a much larger collection of tools, both hand and power. But your tool collection doesn't stop there. You also need a sturdy toolbox to store and organize your tools, preferably one that makes it a cinch to find exactly what you need when you need it, and it's easy to tote where you need to work. That's why we researched the best portable toolboxes available today, and then narrowed down the many options for those of us who deserve top billing in a variety of categories. These are our favorite portable toolboxes. The Keter Masterloader Portable Tool Box is about as close as you'll get to having a toolkit right by hand where you need it. This super durable resin toolbox does not dent, peel, yolk, or crack, even in hard time. And with two 7-inch rubber wheels, an extendible handle and a central lock, it's easy to eat along with you while you work. The bottom of the box has plenty of room for its larger tools, such as power drills, hammers, flashlights and sawn-offs. The top of the box has multiple compartments for smaller tools, including six removable bins for nails, screws, tape measurements and other small elements. But best of all, the top of the box is split, so you can slide the two halves apart to facilitate access to each part of the box without lifting off the top shelves. The toolbox is 14.88 x 24.25 x 16.34 inches, and has a weight capacity of 66 pounds. The box itself weighs 13 pounds. You don't need all this extra space and just want something for your basic set of tools? The Dewalt Tough System DS 300 will have you covered. Similar to the old style of toolboxes that give you a single compartment to work with, this toolbox takes you to the next level offering extra protection. If you want something that will protect your tools no matter what is happening outside, this is the toolbox for you. The exterior is made of a 4 millimeter thick foam wall. A seal of water is sandwiched between the lid and the box to maintain moisture. In addition, the supports DeWalt's Tough System metal support. Just paste it into the carrier and secure it using the central locking mechanism. The resistant system allows you to expand your storage space with modular components to suit your exact needs. If you only use a toolbox to keep essentials needed for simple home repairs, hanging images or hardening chair jars, there is no reason to spend a lot of money. But that doesn't mean you have to settle for a lower product; while not designed for rough use in a workplace, the 16-inch Plano Grab-N-Go toolbox is made of heavy plastic that holds well in the middle house. The box measures 16 x 9.5 x 7.5 inches, which is suitable for containing a hammer, screwdriver, pliers, tape measurement, and the other basics needed for tasks around the home. A takeoff tray and a transparent plastic organizer have smaller items such as nails, hooks and screws. This is also a great option if you want an organizer to research crafts or art supplies, or even tackling fishing. Keep a small but rugged toolbox stocked with the basics in your car, and you'll always be ready to deal with unexpected repairs when out and about. The 16-inch Torn Big Red toolbox is perfect for work; at 16.7 x 6.9 x 4.9 inches, it is large enough to hold its hammer, screwed set, pliers, and other tools often needed in an emergency, but is small enough to easily stick to the trunk and light enough - only 2.7 pounds - to lift effortlessly. The toolbox is made of heavy-width steel with a bright red corrosion resistant powder finish that gives it a retro look. The heavy metal latch keeps the box securely closed, so there is no need to fear that your tools will disperse when you take a quick turn or stop, and the comfortable handle to maintain makes it easy to get the box when needed. There are no interior compartments, so you can make full use of the space to contain larger tools. Here is a toolbox very suitable for the DIY enthusiast enough the toolkit goes beyond the basics and you want to keep them protected and well organized, but not be overwhelmed by a large tool chest. The Goplus 20-inch Portable Tool Chest is made of durable steel with a red paint resistant to corrosion powder. There are two locks to keep the box secured, and an easy grip handle so you can tote wherever you need it. The chest has three drawers with smooth ball bearing slides, plus a superior storage compartment for a total of four compartments to organize your tools. The weight capacity of each drawer is 22 pounds. The box itself weighs 18 pounds. At 20.5 x 8.5 x 12 inches, there is plenty of room for all the basics, plus some extras, making this a good choice for home, garage or workshop. True road warriors need more than just a basic toolbox to get the job done. If you are a professional or simply need to transport a lot of equipment around with you, have a portable workshop in the will keep you ready and efficient while you work. The DeWalt DWST20800 is like having four separate toolboxes with you at all times. The telescopic design folds from a single rectangle into a four-level work station with the push of a single latch. Each storage space is easily accessible once everything is deployed. The different levels will allow you to organize different tools and parts while keeping everything in immediate scope as you work. When is it until, the toolbox is easy to transport and store. Heavy wheels are suitable for the most common work terrains. Stackable toolboxes give you the best of two worlds: Stack them high as a tool chest for maximum storage in the smallest footprint, or separate them when needed to tote only the tools you need. And the oversized stalwart Portable Tool Chest performs both scenarios as a champion. The system consists of three stackable robust plastic toolboxes: 19.5 x 9 x 7, 19.5 x 9 x 13 and 19 x 9 x 9 inches. The first two boxes have side handles so you can easily carry them when separated from the battery, while the bottom box is fixed to the steel bearing frame that supports the entire system. A double latch keeps the boxes securely locked when not in use, and a pull-up handle allows you to comfortably roll the entire system over the two sturdy plastic wheels. The entire system weighs 33 pounds and has a total weight capacity of 150 pounds. If you have a large collection of hand and power tools, and you're looking for a big box to get them into, you've met your match with the Milwaukee Packout 22-inch Rolling Tool Box. This bear in a box measures a weight of 22.1 x 18.6 x 25.6 inches, and has an impressive weight capacity of 250 pounds. The box itself weighs 23 pounds when empty. The Packout is basically a big box; there are no trays or organizers included, so you can pack even large or oddly shaped tools easily. It is made of heavy red impact resistant plastic with metal reinforced corners, and is lime-sealed to keep your tools safe from the elements. Two 9-inch, off-road wheels and an industrial force extension handle make it a breeze to roll the box wherever you want, and reinforced hinges keep the box from falling apart even in rigorous conditions. Lasting final verdict, spacious and plenty of compartments to keep your tools well organized - No wonder we love the Keter Masterloader Portable Tool Box (available at Walmart). But if you're looking for something to house a really great collection of tools, you'll be happier with the Milwaukee Packout Rolling Tool Box (available at Ace Hardware), which has a storage capacity of 250 pounds. Capacity.
